# Why LUMIFIL®?

THE BRAND YOU CAN TRUST.

## 01 HCCL Technology

A stabilised 3D matrix structure for high safety and optimal rheological properties.

## 02 Proven Safety

Clinically trialled against Restylane and shown to provide superior results\*

## 03 CE Marked, ISO 13485

LUMIFIL® is **CE certified**, which means the product complies with the EU health, safety and environmental regulations for medical devices Class III.

LUMIFIL®

# Clinical Results

SUCCESSFULLY TRIALLED AGAINST RESTYLANE

The Wrinkle Severity Rating Scale and Global Aesthetic Improvement Scale was used for this clinical study with patients studied for 24 weeks to ensure consistent results.

● LUMIFIL® Dermal Fillers    ● RESTYLANE Dermal Fillers

**\*At 8, 16 & 24 weeks, wrinkles were less visible on those treated with LUMIFIL®**

LUMIFIL®

# What is BDDE

BDDE stands for Butanediol Diglycidyl Ether

BDDE chemically links HA chains together, **creating a stable, cohesive gel that holds shape** compared to non-crosslinked HA (skin boosters), which degrade quickly.

In high-quality fillers, residual BDDE levels are kept well below safety thresholds – **to ensure biocompatibility and minimise risk of delayed inflammatory response.**

**LUMIFIL dermal fillers have ZERO residual BDDE found after purification.** For ultimate purity consistency and patient safety.

| Item                | Requirement     | Results              |
|---------------------|-----------------|----------------------|
| Appearance          | Transparent Gel | Colourless Gel       |
| pH                  | 6.5 ~ 7.5       | 6.73                 |
| HA-Content          | 18 ~ 22 mg/mL   | 20.17 mg/mL          |
| Lidocaine Content   | 90.0 ~ 110.0%   | 98.23%               |
| <b>BDDE-Content</b> | <b>≤ 2ppm</b>   | <b>Non-detection</b> |
| Volume of Gel       | ≥ 1.0mL         | 1.08 mL              |
